

Contents

Section	Page
1.0 Introduction	1-1
1.1 Project Background.....	1-1
1.2 Study Objective.....	1-6
1.3 Ongoing Studies.....	1-6
1.4 Organization of the Report	1-7
2.0 Site Information.....	2-1
2.1 Regulatory Framework.....	2-1
2.2 Landfill Operational History	2-4
2.3 Land Use	2-5
2.3.1 Land Use Surrounding Landfill 26	2-5
2.3.2 Land Use at Landfill 26	2-7
2.4 Landfill Configuration.....	2-7
2.4.1 Landfill Closure Cap.....	2-10
2.4.2 Ancillary Components and Facilities.....	2-11
2.5 Summary of Previous Investigations and Monitoring Data	2-14
2.5.1 Summary of Previous Landfill Gas Investigations.....	2-14
2.5.2 Summary of Methane Monitoring Data	2-16
2.6 Geologic and Hydrogeologic Information	2-19
2.6.1 Topography.....	2-21
2.6.2 Hydrology	2-21
2.6.3 Geology	2-21
2.6.4 Hydrogeology	2-26
2.7 Data Evaluation	2-31
3.0 Definition and Evaluation of the Problem.....	3-1
3.1 Expected Generation, Duration, and Fate and Transport of Methane in Landfills.....	3-1
3.1.1 Generation.....	3-1
3.1.2 Duration	3-1
3.1.3 Fate and Transport.....	3-2
3.2 Methane Contribution from Natural Sources.....	3-3
3.3 Generation, Duration, and Fate and Transport of Methane Migration at Landfill 26.....	3-3
3.3.1 Generation and Duration.....	3-3
3.3.2 Fate and Transport.....	3-6
3.4 Qualitative Evaluation of Risk.....	3-7
3.4.1 Rate of Methane Generation	3-8
3.4.2 Methane Migration	3-8

3.4.3 Accumulation of Methane in Zones Near Receptors.....	3-15	
3.5 Methane Risk Summary	3-19	
3.6 Evaluation of Presence and Migration of Volatile Organic Compounds in Soil Vapor.....	3-19	
4.0 Presentation of Remedial Options.....	4-1	
5.0 Evaluation of Remedial Options	5-1	
5.1 Evaluation Criteria.....	5-1	
5.2 Evaluation of Options.....	5-2	
5.2.1 Option 1: Continue Landfill Gas Probe Monitoring.....	5-2	
5.2.2 Option 2: Monitoring Combined with Installation of Passive Cap-Venting System.....	5-4	
5.2.3 Option 3: Monitoring Combined with Installation of a Passive Buffer Zone Venting Trench.....	5-8	
5.2.4 Option 4: Monitoring Combined with Installation of an Active Buffer Zone Venting Trench.....	5-12	
5.2.5 Option 5: Monitoring Combined with Installation of Utility Protection System.....	5-16	
5.2.6 Option 6: Monitoring Combined with Activation of the Existing Groundwater Pump-and-Treat System	5-19	
5.2.7 Option 7: Monitoring Combined with an Active Extraction System with Pre-established System Shutdown Criteria	5-20	
5.3 Evaluation Summary	5-22	
6.0 Recommended Remedial Option.....	6-1	
6.1 Summary.....	6-1	
6.2 Recommended Course of Action.....	6-1	
6.3 Additional Data Needs	6-2	
7.0 References	7-1	
Appendices		
A	Summary of Major Investigations and Regulatory Actions at Landfill 26	
B	Methane Data	
C	Historical Groundwater Elevation Measurements at Landfill 26	
D	Landfill Gas Generation Model	
E	Shea Homes Data	
Tables		
2-1	Summary of Soil Gas Methane Monitoring Results, 1986 through 2000 Landfill 26, Hamilton Army Airfield	2-16
2-2	Summary of Soil Gas Methane Data Greater than 5 Percent by Volume Landfill 26, Hamilton Army Airfield	2-18
3-1	Summary of Detected VOCs.....	3-17

4-1	Summary of Remedial Options and Their Intended Function	4-3
5-1	Summary of Evaluation of Options	5-23

Figures

1-1	Site Location Map.....	1-2
1-2	Vicinity Map.....	1-3
1-3	Site Layout Landfill 26	1-4
1-4	Gas Monitoring Probe Locations.....	1-5
2-1	Proposed Gas Monitoring Probe Locations.....	2-3
2-2	Proposed Housing.....	2-6
2-3	Cross Section Details of Landfill 26 Cap	2-8
2-4	General Grading and Drainage Modification Plan	2-9
2-5	Existing Monitoring Network Landfill 26.....	2-12
2-6	Landfill Gas Monitoring Probes and Groundwater Extraction Well System.....	2-13
2-7	Bottom of Refuse Contour Map	2-20
2-8	Top of Refuse Contour Map.....	2-22
2-9	General Grading and Drainage.....	2-23
2-10	Geologic Map of the Landfill 26 Area	2-24
2-11	Groundwater Elevations and Contours, September 2000.....	2-27
2-12	Subsurface Units at Base of Refuse Materials	2-28
2-13	Monthly Groundwater Levels.....	2-30
3-1	Modeled Landfill Gas Generation.....	3-5
3-2	Location of Cross Sections.....	3-9
3-3	West-East Cross Section Through GMP-9.....	3-10
3-4	Diagrammatic Cross Section Along Edge of Landfill	3-11
3-5	Southwest-Northeast Cross Section Through GMP-5	3-12
3-6	South-North Cross Section Through GMP-13	3-13
3-7	Adjacent Homes and Utilities.....	3-16
5-1	Passive Cap Venting System	5-6
5-2	Passive Buffer Zone Venting Trench.....	5-9
5-3	Preliminary Concept for Passive Buffer Zone Venting Trenches	5-10
5-4	Active Buffer Zone Venting Trench	5-13
5-5	Preliminary Location for Active Buffer Zone Venting Trenches.....	5-14
